Risk Taking: An Introduction

Something of value such as health, wealth, position and power can be gained or lost when taking a risk. Risk always involves uncertainty. Therefore, it is always wise to take calculated risks based on planning and analysis. When risk-taking is a planned activity, it can be managed in a better way. Risk management involves four steps. These are Risk Identification, Risk Assessment, Risk Control and Risk Review. Always remember risk taking is like a game of dice.

Risk Taking in Life

Risk taking is an important characteristics of a successful life. Risk taking requires the quality of fortitude. Fortitude is the courage of risk-taking with prudence. Risk-taking is moving out of the comfort zone to venture into the world of impossibilities. If we do not have sufficient courage to accept risks, we will never realize our full potential. We will never do all that is there for us to do. We will never become all that we can be. We will never experience real beauty, joy and freedom.

Risks and Rewards

Without risks, there are no rewards. In fact, every activity, if it is in personal life or professional life, involves a small amount of risk. Opportunities for success and growth are often disguised as big risks. Risk taking is important to welcome all life changing opportunities and opportunities for growth are important for success in life. **No Risks, No Rewards.**
